

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

MIDDLEBURY, VT.  
PUBLISHED BY THE COLLEGE

1917

## COMPILER'S NOTE

THE late Dean Walter E. Howard, to whom the College is chiefly indebted for the valuable General Catalogue of its centennial year, had accumulated before his death much valuable data for a new edition. This was placed in the hands of the present compiler in December, 1915, and since that date the collection of new material and revision of former records has proceeded as rapidly as other duties would allow. The present volume includes the records of all who have been connected with the College from 1800 through the year 1915, with corrections to the time of going to press. A new feature is biographical records of all trustees, to which special attention has been given. Non-graduates are listed in connection with the records of the classes of which they were members. Students who were registered with more than one class, while in College, are listed with the class in which their names last appear on the College records.

The students of the Medical School at Castleton, from 1819 to 1827, and those of the Medical School at Woodstock, from 1833 to 1837, received their degrees from this College, but did not reside here and had no other connection with Middlebury than as recipients of her degree of Doctor of Medicine. Their names were printed in the General Catalogue of 1890 for the preservation of the record, but it is thought that no valuable purpose would be served by repeating their names in this volume.

Where abbreviations are used in this book they are thought to be self-explanatory. An asterisk is used to mark the names of the dead. The maiden names of married women appear in parentheses and their married names in brackets.

Any person noticing errors in this Catalogue or possessing information that would add to its value will confer a favor upon the College by communicating with the Dean's office. The labors of future cataloguers will be much lightened if the alumni will keep the College informed of important events in their lives and this may always be done through the Dean's office.

MIDDLEBURY COLLEGE,  
March 16, 1917.
